It organized national webinar on Naxalism and internal security of India.

About Add-on Course on Modern Warfare

Modern Warfare defined as information and the way in which it is used is just as important in winning an overall victory in modern warfare as the military tactics adopted to defeat the enemy. As an important application of system simulation in the field of military operational command, warfare simulation can enhance force power effectively. The main simulation objects of modern warfare simulation are integrated joint operations. Compared with traditional warfare simulation, modern warfare simulation shows four main characteristics different from the past: standardized modeling approach, unified common technology framework, series used of warfare simulation system and widely ranged application of warfare simulation
